

Welcome to Cadeon's End of Year Newsletter

2017 has definitely been a year full of change and surprises. The Keystone Pipeline was finally approved, Transmountain faced hurdles with BC and the NEB and Alberta clawed its way out of the 2-year slump. No doubt that we have many challenges ahead, but we at Cadeon think those challenges are really opportunities in disguise.

So as we head into 2018, we want to thank you our customers for your support, loyalty, and business. We look forward to our continued partnership with you in 2018 to tackle these opportunities and make it an even better year.

Year in Review by Phil Unger

CEO of Cadeon

Looking back on 2017 we see a huge focus on Data. The America President insisted that the news that mainstream new provides is fake news and he has called them out time and time again. His favorite way to communicate to his nation is via 160 characters of Twitter.

Are you Ready for GDPR?

What do you know about GDPR? If the answer is nothing, then you need to read this!

GDPR is the General Data Protection Regulation that is coming into law in May of 2018. It sets out strong standards and rules for protecting business and consumer data within the EU and abroad if you are processing EU data.

This is the Tip of the Iceberg when it comes to requiring strong protocols and processes for business and organizations. Severe penalties, jail, and significant monetary fines are not to be taken lightly. Cadeon can help to guide you through this process to get ready.

How to Unify your data with

Cognitive Search is probably something you have heard of but don't know what it is. When you think AI or intelligent search, the Attivio solution actually gets it done for you, compared to others who talk big but produce very little.
