SPOTFIRE ADVANCED TRAINING

Pre-requisites: Spotfire Intermediate or equivalent experience

Length: 2 Days or 4 half-day sessions

Advanced Spotfire Training is intended for power users and developers who are proficient with most of the features of Spotfire and want to explore advanced analytics tool and extend their skills beyond the out-of-box capabilities. Attendees are expected to bring their own device with Spotfire Analyst installed.

The instructor will provide the necessary files for students to complete the training. The focus is on hands-on experiences allowing students to be fully engaged in the training. Instruction consists primarily of hands-on activities during which students can follow along with the instructor as they walk through various aspects of the Spotfire application.
